

Value Sustainability

Building Resilient Communities and Infrastructure

Statement of Qualification

Value Sustainability, established in 2016, is a California based firm aimed at offering high quality, moderately priced and cost-effective consulting services to governments and businesses. We specialize in providing advisory services in sustainable design & planning, climate change and community engagement.

Our Mission Statement

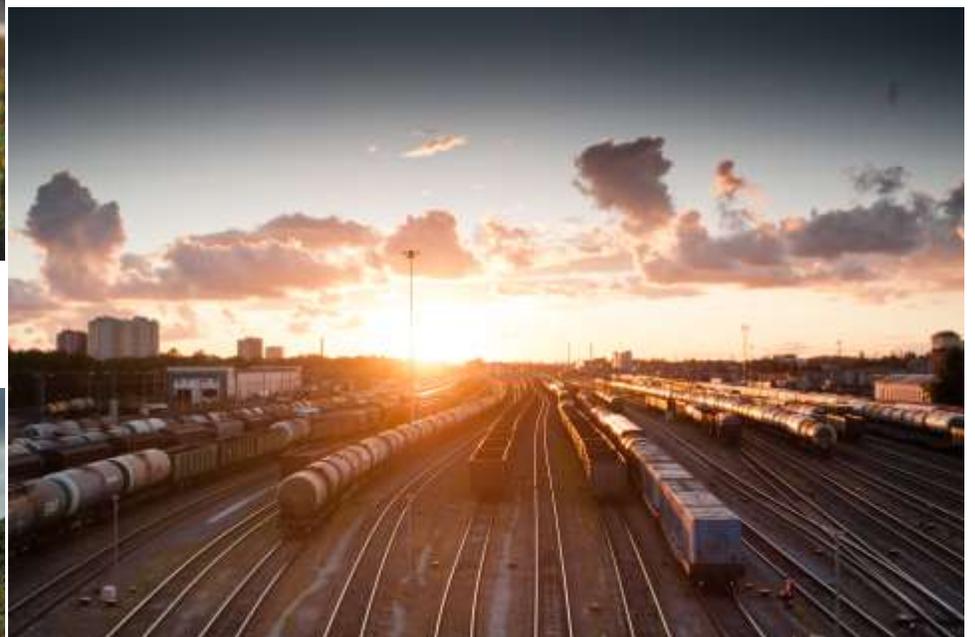

Create an enduring legacy by building a resilient infrastructure and communities. We view ourselves as partners with our clients consisting of diverse stakeholders. Our Mission is to help our clients create innovative solutions and make informed choices to be able to improve their business performance and services.

Our Vision

Become a regionally recognized brand name by capitalizing on human innovation and resourcefulness. We plan on being an agent for change by integrating sustainability, systems thinking and responsible leadership into daily business practices.

Our Goals

1. As a premier consulting firm in Southern California provide holistic and lasting solutions in line with latest policy and technological advancements.
2. Build a network of national and global partnerships to promote knowledge exchange and build sustainable and resilient communities.
3. Motivate and encourage our clients to implement and follow sustainable practices thereby achieving personal and professional fulfillment.
4. Develop and scale green businesses and public-private partnerships.

Sustainability is not a goal to be reached but a way of thinking, a way of being, a principle we must be guided by - *Guilio Bonazzi, Chairman, Aquafil Group.*

"The road to sustainability runs through the world's towns and cities. By building sustainable towns and cities, you will build global sustainability" *Ban Ki Moon, Secretary General of the United Nations.*

Value Sustainability provides consulting services to help our clients overcome barriers and leverage opportunities to build resilience

and foster engaged community. We offer customized services to meet the need of your taxpayers, stakeholders or your agency. Solutions we provide fall under the following five categories:

Climate Change and Resilience: We provide integrated and innovative solutions that solve challenges and identify opportunities related to climate change – and develop a roadmap that fosters business continuity and competitiveness. **Our solutions include:** Carbon Management, Reporting and Assurance - Greenhouse gas Inventories and Projections - Climate Change Impacts and Adaptation - Climate Vulnerability and Risk Assessment - Climate Action/Adaptation Plan - Carbon Capture and Storage Technology Research - Energy and Carbon Regulations - Resiliency Studies, Planning & Recommendations - Economic and Social Impact Assessment and Evaluation – Energy/Community/Infrastructure Resiliency that integrate Emergency and Disaster Management Planning.

Sustainable Design and Planning: Cities are places of economic activities and innovation, but also major emitters of carbon dioxide and, due to their high population and infrastructure density, sensitivity hot spots with regard to climate change impacts. We are committed to providing innovative solutions that foster a sustainable future by creating better-built environments where we work, live and play. **Services we offer include:** Sustainability Strategy Planning - Sustainable project funding Research - Sustainability Preliminary Project Assessment & Sustainability Workshops - *Envision* Certification for Infrastructure Projects - *LEED* Certification for Buildings & Vertical Construction - *GreenRoads* Project Certification for Road projects.

Stakeholder Engagement and Capacity Building: Engaging diverse stakeholders including Government, Business, NGOs, Academia and General Public are crucial for developing environmentally safe and sustainable strategies. An effective outreach that communicates focused, strategic messages to specific target audiences in both a timely and transparent manner. **Our services include:** Building Stakeholder partnerships and convening - Community Outreach & Engagement – Environmental/Sustainability Education - Advocacy & Educational Campaign - Corporate Social Responsibility and Sustainability Management - Global Reporting Initiative Reporting & Verification - Socially Responsible Investment Research - New Clean Technology Research & Analysis - Communication Strategy - Supply Chain Management.

Resource Management - Energy & Water: We recognize water and energy are global issues. We understand that problems of this magnitude need strategic thinking, long-term planning, and a multi-faceted approach. We help our clients navigate today's challenges including: the changing generation mix and efforts to decarbonize, securing fuel and energy supply at reasonable costs and optimizing operational efficiency and customer service. We work with our client to turn these challenges into opportunities to develop their full potential, invest wisely and become more valuable. **Our professional consulting services include:** Low carbon and sustainability Policies and Regulations (Tax benefits and incentives) Research - Sustainability Planning - Private Investors Services - Auditing and Resource Optimization Delivering sustainable water/Energy management.

Sustainable Urban Development and Transport: Population growth, ageing infrastructure and globalization calls for integrated and sustainable urban development and efficient, reliable and cost effective transportation. We have the big-picture and technical understanding essential to achieve truly integrated transport systems and urban development that meet communities' needs today and in the future. **Our team has the capability to provide:** Low carbon transport technology assessments and advice - Research future advances in technologies and efficiency - Technical Support and Policy Development – Ports and Airport Sustainability - Sustainability Management Plan.
